Introduction to the course

The Bachelor's degree program in Health Economy at the Faculty of Health Sciences at MSB Medical School Berlin. After a standard period of study of 6 semesters in the full-time model, it leads to the degree Bachelor of Science (B.Sc.).

In the Bachelor's degree program in Health Economy, students acquire extensive business management fundamentals and at the same time learn essential content in health economy and the basics of medicine in a practical and well-founded training. Through the consistent combination of the disciplines of business administration, medicine and management, skills are acquired in order to be successful in the fields of operational and strategic medical controlling, corporate development, project management office, quality management or as an assistant to the management and to take on leadership responsibility in operational management.

Classification and position of the study program at the faculty

The Bachelor's degree program in Health Economy is offered as an application-oriented degree program at the Faculty of Health Sciences at MSB and leads to a Bachelor of Science degree from a university of applied sciences.

Aims and concept of the course

The aim is to provide students with in-depth knowledge of essential documentation, coding and billing processes, which are a central component of revenue security and are therefore crucial to the economic success of healthcare facilities. In addition, they acquire extensive skills in the areas of economics, business administration and health economy. What is special about the Bachelor's degree program in Health Economy is not only the dual qualification in medicine and business administration, but also the management training acquired at the same time. In addition to the classic management skills such as assertiveness, the ability to think analytically, negotiating skills and a competent appearance, you will also learn specialist skills in classic project and process management as well as case and quality management.

Description of the structure

The Bachelor's degree course is modular in structure, meaning that thematically related subject areas are grouped into modules. A module usually lasts a maximum of two semesters and ends with an examination (e.g. written exam, oral examination interview, presentation). Depending on the workload, credit points (CP) are awarded for a module after passing the examination. A total of 180 CP must be proven for the Bachelor's degree.

The profile of the Bachelor's degree program in Health Economy is based on the following five areas of competence:

- General professional skills in management
- Cross-professional action competence
- Specific professional skills
- Occupational skills
- Methods and social skills

Professional and career opportunities

By combining the specialist skills of Health Economy, an innovative job profile is created with increasing importance for the healthcare industry of the future. The medical controller and medical manager are the bridge builders and important link between medicine and economics.

The following overview shows the individual modules of the Bachelor's degree program, the allocation to the various competency areas, the type of events, the number of credit points to be achieved and the examination results for each module.

Areas of application

- Operational and/or strategic medical controlling
- Corporate development
- Project and process management
- Quality management
- Case management

- Patient management
- Assistance to the management

Admission

- General higher education entrance qualification, subject-restricted higher education entrance qualification or entrance qualifica-

tion for universities of applied sciences according to § 10 BerlHG

- Special admission for professionals in accordance with § 11 BerlHG
- Possibility of further studies according to § 11 BerlHG

About MSB Medical School Berlin

Our university - Interdisciplinary studies

MSB Medical School Berlin - University of Health und Medicine is a private, state-recognized university located in Rüdeshheimer Straße in Berlin-Wilmersdorf. It was founded in 2012 by Managing Director Ilona Renken-Olthoff. Since then, numerous Bachelor's and Master's degree programs have been successfully accredited or reaccredited. Since 2020, MSB has also been offering the state examination course in human medicine at the Faculty of Medicine, which is special because it combines a university of applied sciences and a university with its three faculties. MSB focuses on a consistently interdisciplinary and interprofessional approach to teaching and research in order to train you as a health professional in the long term.

Our campus in Berlin - flourish & develop

MSB offers a unique learning atmosphere at the Rüdeshheimer Straße campus, the "Mecklenburgische Straße" campus and at "Leipziger Platz".
